Task Analysis

According to the suggestion of Simon, we've decided to exclude writing reviews in our key task since it's not the target audience priority concerns and it's not necessary;

I've made some modification to the Task analysis, including combining the task of skimming through menu with the task, order and pay, change "Check the estimated waiting time" to "Waiting to pick up";

Besides, I added a key task that a food truck vendor should do to help refining our prototype design.

Customer:

Task1:

0: In order to check the food truck information.

1.Open the app;

2.Search for the food truck you want to order from;

2.1 Key in the name of the food truck in the search bar;

3.Tap on the selected food truck

3.1 Locate the name, payment system, location and opening time of the food truck

Task2:

0: Order and pay for the food

1.Open the app;

2.Search and selected the food truck you want to order from;

3. Skim through menu, price, nutritional information and pictures of food.

3.1Check nutrition information and estimated waiting time for each food

4.Select and add the desired food into shopping cart

4.1 Add special notes or add-on if needed

5.Check out to pay

5.1View the item in the shopping cart

5.2Check ordering detail of the food

5.3 Select payment method

5.4 Proceed to check out

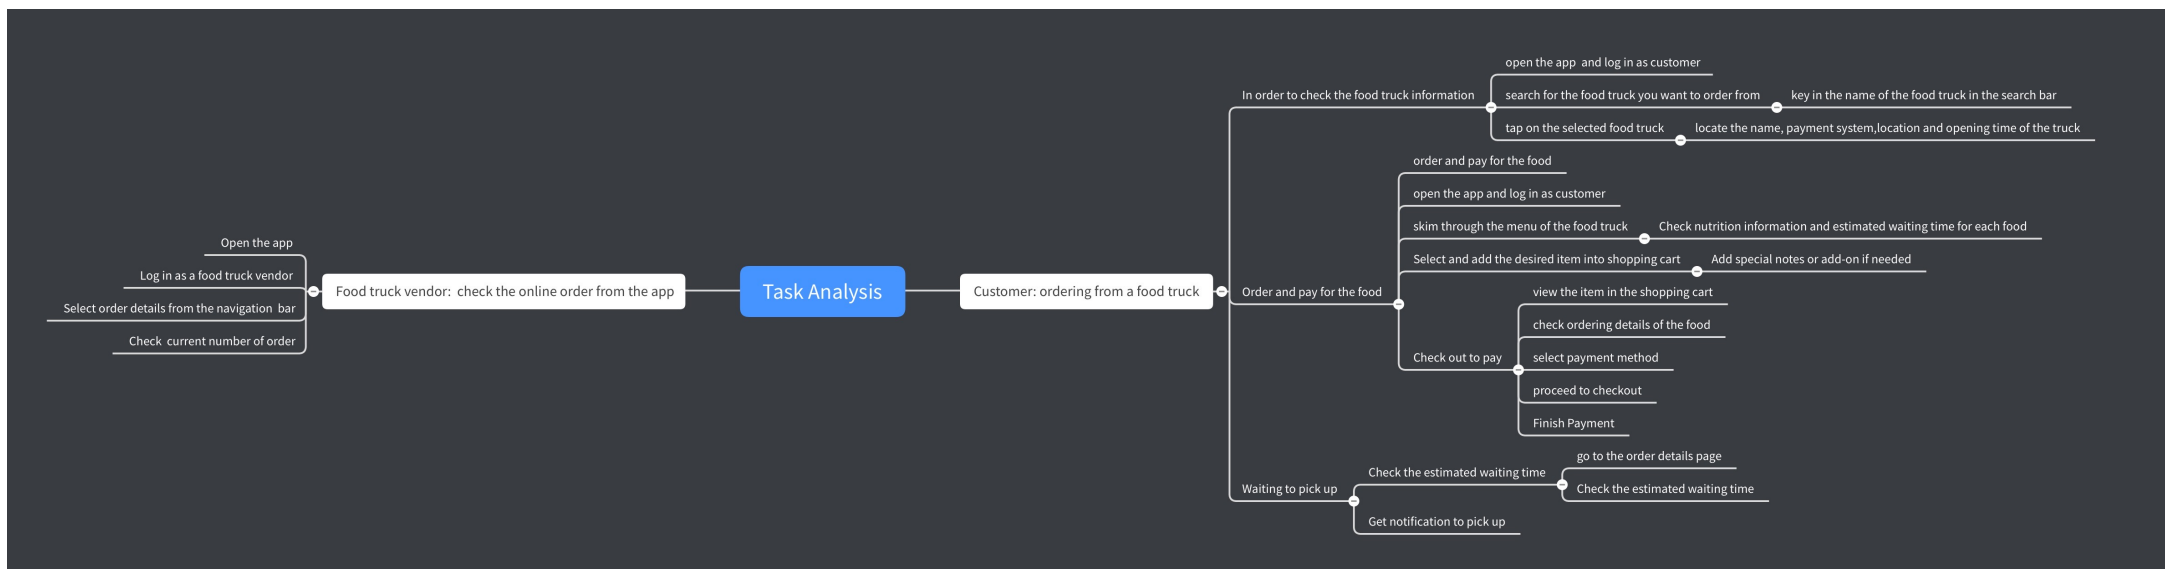

Task3:

0: Waiting to pick up the order

1. Check the estimated waiting time
 - 1.1 Go to the order detail page
 - 1.2 Check the estimated waiting time
2. Get notification to pick up

Food truck vendors:

- 0: In order to check the online order from the app
1. Open the app
2. Log in as a food truck vendor
3. select order details from the navigation bar
4. Check the number of current orders

Testing Script

Scenario:" You are first year student who is nutrition conscious and have no experience eating at food trucks yet. You are in a rush for class; You only have 10 minutes between class, and you want to grab something fast to eat. You forgot to bring cash today and you only have card right now. Using this system, can you show me how to complete the following tasks?

1. Log in to the page and check account details;
2. Check available trucks and their basic information including their locations, opening hours, allowed payment method;
3. Review the nutrition information of food;
4. Add the spicy sausage (the food with least calories) to shopping cart
5. Proceed to check out and pay for the food;

Notes:

1. User need to login as a customer(but no need to provide specific info to sign up); User may need to manually set up their location or consent to the app to gain access to their location while using the app;
2. Find available food/food truck through filter or search bars; User will need to locate all basic info of food trucks.
3. User will need to locate the nutrition information and the price for the food.
4. User will need to select payment method or fill up Card info;

Scenario:" You are a food truck vendor who runs a food truck near Sidney Smith Hall. You are willing to use new technology to attract more customers. But you are worried your hand may get greasy when you are cooking so that it's hard for you to operate on the machine. Using this system, can you show me how to complete the following tasks?

1. Log in to the page and check basic truck details;
2. Check current order;
3. Set up voice control to help complete the order

Notes:

1. User need to login as a Vendor, need to set up for the account;
2. User will need to locate the order details.
3. User will need to decide whether give consent to the system to help you set up voice control;
